Dilip Buildcon

Revenue, EBITDA miss estimates, outlook upbeat on strong OB; retain HOLD

Dilip Buildcon's (DBL) revenue/EBITDA stood at ~Rs18.6/2bn in Q4FY26, missing our estimate by 12/1%, led by soft execution owing to lean OB at the beginning of the year. Nonetheless, we expect EPC revenue/EBITDA to clock ~20/22% CAGR from FY26-28e, led by execution ramp up due to all-time high OB of ~Rs288bn, anticipation of robust wins in future and margin expansion. Net-debt levels remained elevated at ~Rs19bn, which is guided to be zero by FY28e. Coming to annuity business, the company plans to transfer another 11 HAM assets into listed InvIT before 1QFY28, unlocking value and serving as monetisation vehicle. MDO ramping up continued achieving ~29mmt, targeted to meet peak 57mmt by FY29. Considering these developments, we maintain **HOLD** rating on the stock with a revised SOTP-based TP of ~Rs596 (from ~Rs572 earlier), valuing its EPC business at 8x FY28e EPS.

Soft Execution Continued in FY26; FY27 Growth Banks on Strong OB: Revenue/EBITDA fell to ~Rs70.1/7.3bn in FY26 due to (a) compressed OB in the beginning of the fiscal; and (b) recent added orders, which are yet to enter execution. Looking ahead, the management has guided the revenue to grow by ~30-40% in FY27 with ~150-200bps expansion in EBITDA margin, as the company witnessed a record order inflow of ~Rs185bn, which is guided at ~Rs100-120bn in FY27.

Annuity Business: Coal MDO achieved ~29mmt (vs. original target of 23mmt), which is expected to touch ~37/47/57mmt in FY27/28/29e. Recently added bauxite MDO is expected to begin operations in the next three years. MDO revenue was ~Rs16.9bn in FY27 (vs, ~Rs16.1bn in FY25). EBITDA margin contracted from ~26% to ~23% due to slow evacuation by the client and rise in HSD cost, which is expected to normalise, going forward.

InvIT: The company plans to monetise eleven assets in two tranches in 1QFY27 and 1QFY28, to unlock ~Rs18bn and taking total InvIT investment to ~Rs33-35bn. Unlocked capital shall be utilised to reduce standalone debt (as the management targets net debt zero by FY28) and infusion of capital in HAM, renewables and MDO business.

Management Commentaries: With 13 new order wins of Rs185bn in FY26 (3 in Q4FY26), the OB reached a record ~Rs288bn (~4.1x TTM revenue). Capex discipline remains intact with focus on optimal utilisation of existing assets and selective capital allocation. Net standalone debt stood at ~Rs18.8bn as of Q4Y26. (Rs21bn in Q3). Standalone revenue growth is guided at ~30-40% y/y for FY27 and EBITDA margin at ~11-12%.

Outlook and Valuation: We expect the company's EPC revenue/EBITDA to clock ~20/22% CAGR over FY26-28e considering recent robust inflows and lead time before entering execution. We marginally increase our revenue estimate by ~3.2/1.5% for FY27/28 and upwardly revise EBITDA margin estimate by 13/9bps. Thus, we maintain **HOLD** rating on the stock with a revised SOTP-based TP of ~Rs596 (from Rs572 earlier), valuing its EPC business at 8x FY28e EPS. **Key Risks:** (a) Lower-than-expected execution; (b) slowdown in order addition; and (c) inflated working capital levels.

Result Highlights

Roads still a major revenue contributor in FY26, followed by irrigation, RE, urban development and mining.

Coal production rising at two MDOs; 29mmt in FY26, almost double by FY29.

FY27 revenue guided at 30-40% over FY26, margin likely at 11-12%.

Earnings Concall – Key Takeaways

Guidance

- Standalone revenue is growth guided at ~30-40% y/y for FY27, aided by a healthy ~Rs280bn OB and strong execution visibility. EBITDA margin guidance maintained at ~11-12%, while targeted order inflows stand at ~Rs100–120bn for FY27e.
- The management reiterated focus on becoming near net debt-free by FY28. Standalone debt currently stands at ~Rs18bn, against which the company holds ~Rs16bn of InvIT units. FY27 debt reduction guidance stands at ~Rs6-8bn, aided by EPC cash generation, scaling mining operations and increasing InvIT distributions.
- Capex discipline remains intact with focus on optimal utilisation of existing assets and selective capital allocation. Incremental investment required for transfer of remaining 11 HAM assets into InvIT stands at <Rs2bn, while asset monetisation and InvIT distributions continue to remain key balance sheet deleveraging levers.

Bid Pipeline

- DBL reported a record order inflow of ~Rs185bn in FY26, beating its original guidance. The current OB remains among the most diversified in the sector, while the active bid pipeline stands at >Rs800bn across roads, mining, transmission, water, urban infra and other infrastructure segments.
- Infrastructure awarding activity remained relatively sluggish in FY26 due to elections, regulatory scrutiny and administrative delays. However, it remains optimistic on medium-to-long-term infrastructure opportunities, aided by continued government's focus across roads, railways and other infra sectors.
- Mining continues to scale up as a key long-term earnings and cash flow driver. Consolidated coal production stood at ~28.7mmt in FY26, while the management aims scaling production to ~57mmt by FY29. Mining revenue is likely to rise from ~Rs16bn in FY26 to ~Rs25bn in FY27 and further to ~Rs40bn by FY29, aided by ramp-up at Siarmal and Pachhwara mines.

Order Book and Order Inflows

- With 13 new order wins of Rs185bn in FY26 (3 in Q4FY26), the OB reached a record ~Rs288bn (~4.1x TTM revenue). It already achieved full-year order inflow guidance in FY26. The management indicated that ~Rs800bn of bids are currently under evaluation across varied verticals.
- FY26 order wins were largely EPC-led (11 EPC and 2 HAM) and diversified across Rajasthan, Haryana, MP, Kerala, TN, Odisha, Karnataka, Bihar and Gujarat. Key large-ticket orders include: ~Rs49bn solar project under PM Kusum (MP), ~Rs34bn road project in Bihar, ~Rs20bn irrigation HAM project in Rajasthan, Rs18.5bn transmission project in Karnataka, and Rs17.5bn (EPC value) mining contract (NALCO, Odisha)
- OB is diversified with roads constituting 19%, irrigation 16%, mining 20%, tunnelling 6%, RE 18%, transmission 6% and others (optic fibres, special bridges, urban development, metro, water supply, petroleum & gas) 14%

MDO

- Mining operations continued to scale up strongly in FY26, with Siarmal production reaching ~22.3mmt and Pachhwara ~6.37mmt, taking consolidated coal production to ~28.72mmt for FY26 against original target of ~23mmt.
- Its long-term target of scaling consolidated coal production to ~57mmt by FY29, positioning mining as a major long-duration earnings and cash-flow driver. The management guided that mining revenue could rise from ~Rs16bn in FY26 to ~Rs25/31/40bn in FY27/28/29e.
- DBL recently added Pottangi Bauxite Mine from NALCO of ~Rs50bn spanning 25 years with option to extension for further 10 years. Brief scope of work includes extraction of annual 3.5mmt for 22 years, Installation of OLCC (conveyor) of 18.3km, construction of alternate road and water intake facility.
- As per the management, temporary pressure on mining margin was due to delayed evacuation and unavailability of railway rakes at Siarmal, leading to inventory build-up at mine site. However, it expects margin to improve structurally, as operating leverage rises and coal handling plant becomes operational. Rise in HSD cost partially led to margin compression in FY26.

HAM Monetisation and Alpha InvIT

- The management reiterated that InvIT monetisation strategy remains on track, with seven HAM assets already transferred into Anantam Highways InvIT. The remaining 11 HAM assets are likely to be transferred gradually by Q1FY28, aligned with project completion/COD timelines.
- Anantam Highways InvIT was listed in Q3FY26, with the management emphasising that the InvIT is intended to be a long-term annuity platform rather than a one-time monetisation event.
- DBL currently holds ~Rs14bn worth of units in Anantam Highways InvIT along with ~Rs2bn in Shrem InvIT, taking total InvIT holdings on the balance sheet to nearly ~Rs16bn.
- The remaining 11 HAM asset transfers are expected to require ~Rs1.7bn of incremental investment, while DBL expects to receive InvIT units valued at ~Rs18bn on transfer, implying substantial equity value creation and balance-sheet strengthening. Post completion of all 18 HAM asset transfers, total InvIT unit value is expected to rise to ~Rs30-33bn.
- Currently, the management does not intend to monetise the InvIT units, as the broader strategy is to build a long-duration distribution platform generating predictable cash flows over the next 15-20 years. InvIT distribution, EPC cash generation and mining cash flows are likely to support deleveraging and the targeted near net debt-free balance sheet by FY28e.

Debt

- Net debt (standalone) stood at ~Rs18.8bn as of Q4 vs. Rs21bn as of Q3.
- For FY27, the management guided for debt reduction of ~Rs6-8bn. It also highlighted that debt has already reduced by ~Rs2.5-3bn q/q. The management reiterated that DBL aims to be near net debt-free by FY28e.

Equity Requirements in Renewable SPV

- The management clarified that the strategy is to minimise its own BS equity commitment in transmission and RE SPVs. Around 85% of total equity requirement is likely to be funded by external investors directly at SPV level, while DBL itself would contribute only ~15% equity.
- Total equity requirement for these projects is ~Rs16bn (~Rs12bn in solar and ~Rs4bn in transmission). However, DBL's own contribution would remain limited (~15%) due to the planned investor participation structure.
- The broader objective behind this structure is to preserve FCF, reduce standalone debt and achieve near net debt-free BS by FY28.

Outlook and Valuation

Moderate execution in FY26 was due to lagged impact of lean OB at the beginning of the year. However, DBL saw string of awards post Q1FY26 with record inflow of ~Rs185bn and a record OB of ~Rs288bn. We factor in the lead time to achieve desired execution of newly added orders and expect ramping up with desired execution levels in FY27. Thus, we increase our revenue estimate marginally by ~3.2/1.5% for FY27/28e effectively translating to revenue CAGR of ~20% over FY26-28e. Operational efficiency is expected to set in partially off-setting rise in input cost, marginally increasing EBITDA margin by ~13/9bps in FY27/28e

Considering the diversified OB with recent foray into RE and transmission, progress in MDO and InvIT listing, and strong opportunity pipeline, we maintain HOLD rating on the stock with a revised SOTP-based TP of Rs596 (from Rs572 earlier) with the core-EPC business rolled forward and valuing it at 8x FY28e EPS.
